Patient Name: MARY JONES	**Account: Desert Kidney Associates Casa Grande Florence**	**Order Code: 2021-0011992**
DOB: 12/22/1951	**Provider: Ruchir Patel**	**Sample Type: Urine**
Patient Gender: F	**Accession: 21120600024**	**Collected: 12/02/2021**
Patient Phone Number: (520) 868-4812	**Report Status:**	**Received: 2021-12-06T15:34:17.181050**
		Reported: 04/05/2022

PRESCRIPTION LIST

Losartan (Cozaar) , Amlodipine (Norvasc) , Furosemide (Lasix) , Atorvastatin (Lipitor) , Oxycodone (OXY , Percocet , Endocet , Percodan , Percolone , Roxicodone , Tylox) , Vitamin D3 (cholecalciferol-D3) (D3-50) , Triamcinolone (Aristocort) , Zolpidem (Ambien)

C20, Z51.81, Z79.899, I10 Hypertension, N18.2

INCONSISTENT

NOT PRESCRIBED — DETECTED

Class	Test	Cutoff (ng/mL)	Results (ng/mL)
STIMULANT	**Caffeine**	50	> 2500

[DDI] The metabolism of Zolpidem can be decreased when combined with Caffeine.
[DDI] The metabolism of Zolpidem can be decreased when combined with Caffeine.
[DDI] The metabolism of Zolpidem can be decreased when combined with Caffeine.
[DDI] The metabolism of Zolpidem can be decreased when combined with Caffeine.
[DDI] The metabolism of Zolpidem can be decreased when combined with Caffeine.
[DDI] The metabolism of Zolpidem can be decreased when combined with Caffeine.
[DDI] The metabolism of Zolpidem can be decreased when combined with Caffeine.

INCONSISTENT

PRESCRIBED — NOT DETECTED

Class	Test	Cutoff (ng/mL)
STATIN	**Atorvastatin**	10

[DDI] The metabolism of Atorvastatin can be decreased when combined with Losartan.
[DDI] The metabolism of Atorvastatin can be decreased when combined with Losartan.
[DDI] The metabolism of Atorvastatin can be decreased when combined with Losartan.
[DDI] The metabolism of Atorvastatin can be decreased when combined with Losartan.
[DDI] The metabolism of Atorvastatin can be decreased when combined with Losartan.
[DDI] The metabolism of Atorvastatin can be decreased when combined with Losartan.
[DDI] The metabolism of Atorvastatin can be decreased when combined with Losartan.
[DDI] The metabolism of Oxycodone can be increased when combined with Triamcinolone. The risk or severity of hypokalemia can be increased when Triamcinolone is combined with Furosemide. The metabolism of Zolpidem can be increased when combined with Triamcinolone. The risk or severity of myopathy, rhabdomyolysis, and myoglobinuria can be increased when Triamcinolone is combined with Atorvastatin. The metabolism of Amlodipine can be increased when combined with Triamcinolone.
[DDI] The metabolism of Oxycodone can be increased when combined with Triamcinolone. The risk or severity of hypokalemia can be increased when Triamcinolone is combined with Furosemide. The metabolism of Zolpidem can be increased when combined with Triamcinolone. The risk or severity of myopathy, rhabdomyolysis, and myoglobinuria can be increased when Triamcinolone is combined with Atorvastatin. The metabolism of Amlodipine can be increased when combined with Triamcinolone.
[DDI] The metabolism of Oxycodone can be increased when combined with Triamcinolone. The risk or severity of hypokalemia can be increased when Triamcinolone is combined with Furosemide. The metabolism of Zolpidem can be increased when combined with Triamcinolone. The risk or severity of myopathy, rhabdomyolysis, and myoglobinuria can be increased when Triamcinolone is combined with Atorvastatin. The metabolism of Amlodipine can be increased when combined with Triamcinolone.
[DDI] The metabolism of Oxycodone can be increased when combined with Triamcinolone. The risk or severity of hypokalemia can be increased when Triamcinolone is combined with Furosemide. The metabolism of Zolpidem can be increased when combined with Triamcinolone. The risk or severity of myopathy, rhabdomyolysis, and myoglobinuria can be increased when Triamcinolone is combined with Atorvastatin. The metabolism of Amlodipine can be increased when combined with Triamcinolone.
[DDI] The metabolism of Oxycodone can be increased when combined with Triamcinolone. The risk or severity of hypokalemia can be increased when Triamcinolone is combined with Furosemide. The metabolism of Zolpidem can be increased when combined with Triamcinolone. The risk or severity of myopathy, rhabdomyolysis, and myoglobinuria can be increased when Triamcinolone is combined with Atorvastatin. The metabolism of Amlodipine can be increased when combined with Triamcinolone.
[DDI] The metabolism of Oxycodone can be increased when combined with Triamcinolone. The risk or severity of hypokalemia can be increased when Triamcinolone is combined with Furosemide. The metabolism of Zolpidem can be increased when combined with Triamcinolone. The risk or severity of myopathy, rhabdomyolysis, and myoglobinuria can be increased when Triamcinolone is combined with Atorvastatin. The metabolism of Amlodipine can be increased when combined with Triamcinolone.
[DDI] The risk or severity of myopathy, rhabdomyolysis, and myoglobinuria can be increased when Triamcinolone is combined with Atorvastatin.

CONTRAINDICATION — NOT TESTED

Drug	Contraindication
Furosemide	[CI] Contraindicated withChronic kidney disease, stage 2 (mild) [CI]Chronic kidney disease, stage 2 (mild) [CI] Chronic kidney disease, stage 2 (mild) [CI] Chronic kidney disease, stage 2 (mild) [DDI] The risk or severity of renal failure and hypotension can be increased when Furosemide is combined with Losartan.
Triamcinolone	[DDI] The risk or severity of hypokalemia can be increased when Triamcinolone is combined with Furosemide. [DDI] The metabolism of Zolpidem can be increased when combined with Triamcinolone.
Zolpidem	[DDI] Oxycodone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. Oxymorphone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. The metabolism of Zolpidem can be decreased when combined with Losartan. [DDI] Oxycodone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. Oxymorphone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. The metabolism of Zolpidem can be decreased when combined with Losartan. [DDI] Oxycodone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. Oxymorphone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. The metabolism of Zolpidem can be decreased when combined with Losartan. [DDI] Oxycodone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. Oxymorphone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. The metabolism of Zolpidem can be decreased when combined with Losartan. [DDI] Oxycodone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. Oxymorphone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. The metabolism of Zolpidem can be decreased when combined with Losartan. [DDI] Oxycodone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. Oxymorphone may increase the central nervous system depressant (CNS depressant) activities of Zolpidem. The metabolism of Zolpidem can be decreased when combined with Losartan. [DDI] The metabolism of Zolpidem can be decreased when combined with Losartan.
